

Neighbourhood Nature Walk

Choose a colour to focus on and point out every natural thing you see in that colour (ie. red, look for red flowers, trees, birds, etc.).

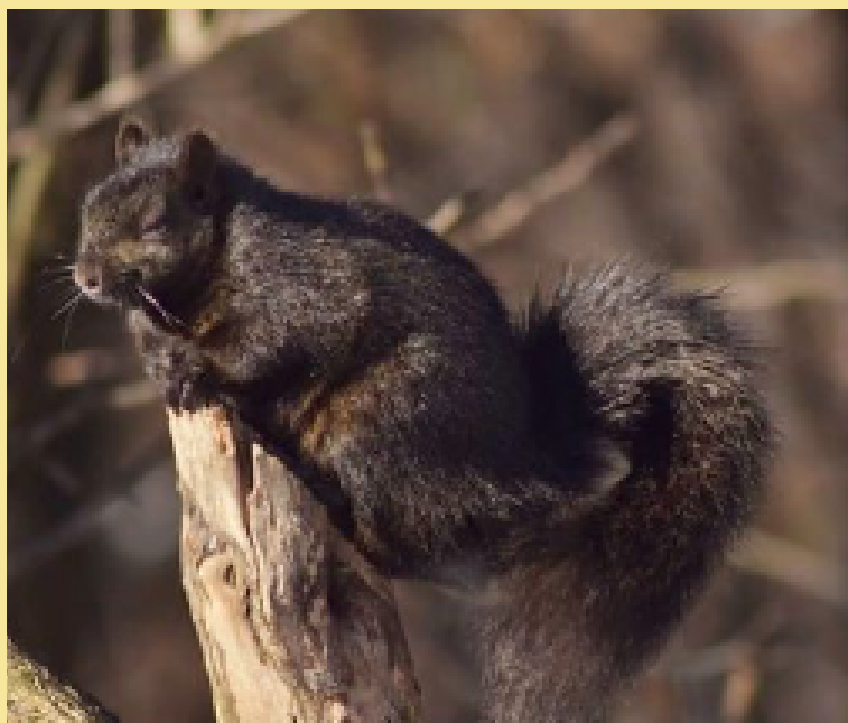

What nature sounds do you hear (birds chirping, bees buzzing, etc.)?

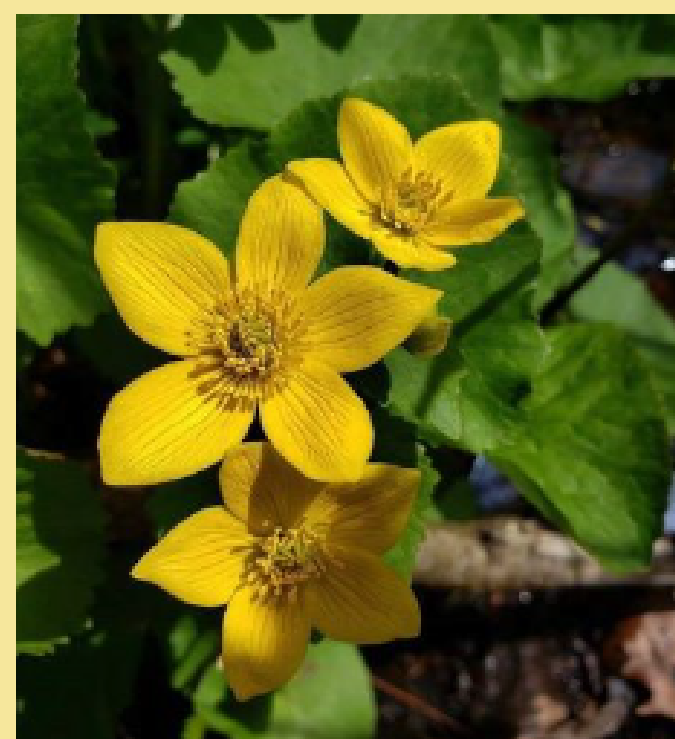

Identify Coniferous vs Deciduous trees.

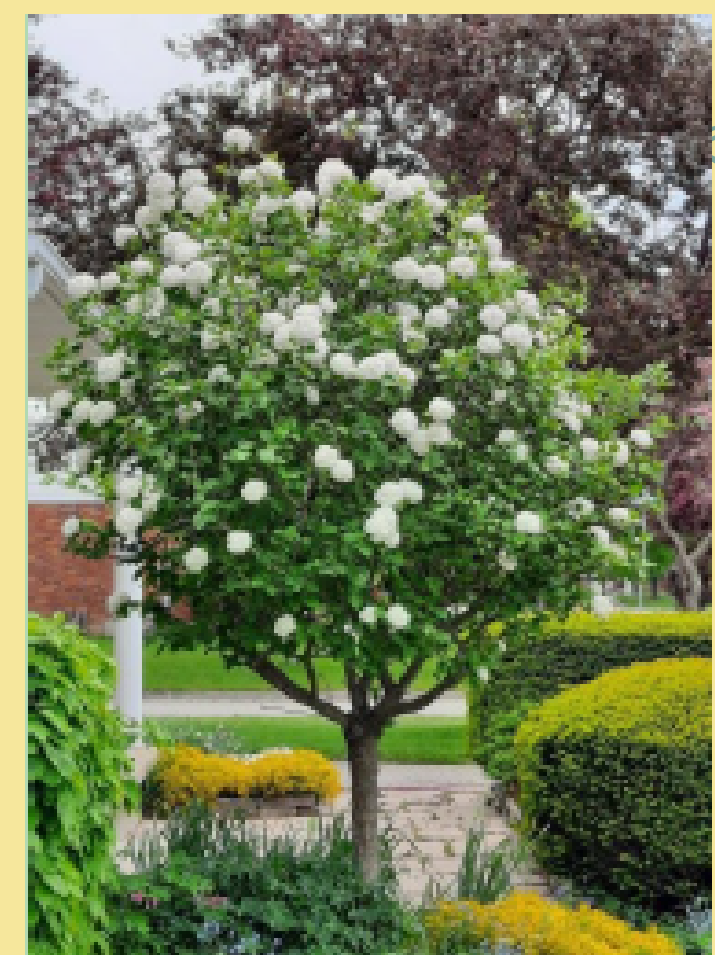

Remember, Coniferous trees keep their needles all year round and Deciduous trees drop their leaves in the fall.

Try and find 5 different types of animals (dogs, cats, birds, squirrels, bunnies, etc.).

What do you smell (flowers, fresh cut grass, skunk?, etc.)?

Feel free to bring a camera to take pictures or bring paper and a pencil to draw your observations.

Share your pictures with Catfish!
